Design: Intuit design team

While the lounge couch Ben serves as the focal point of the Social Zone, creating a comfortable space for colleagues to take a break from work, its larger counterpart, Don, elevates these breaks to a whole new level.

Don is as springy and as elegantly designed as Ben, but with a slightly deeper seating area, which adds a luxurious look and makes things more comfortable. Now everyone can get cosy and enjoy lying down, including four-legged members of the office.

Design: Lauri Visnapuu

Designed for dynamic public and shared spaces, Hektor is a modular seating system built around soft, hexagonal forms that invite movement, interaction and flexible use. The playful geometry allows organic, non-linear configurations that work equally well as flowing seating landscapes or as individual standalone seats.

Kimi

Japandi-inspired, environmentally conscious sofa

Design: Argo Tamm

Meeter Gap

Maintenance-smart modular sofa modules

Design: Argo Tamm

Developed as an evolution of Intuit's best-selling Meeter modular sofa series, Meeter Gap is designed to solve one of the most common yet costly challenges in high-traffic environments: difficult cleaning and ongoing maintenance.

Its key innovation lies in the structural gap between the seat cushion and backrest — a purposeful design detail that allows crumbs, debris and dirt to fall directly to the floor instead of accumulating inside the furniture. This significantly simplifies cleaning, speeds up maintenance routines and helps reduce long-term upkeep costs in spaces where furniture is used intensively every day.

Especially suited for dining areas, educational settings, waiting zones and other demanding public interiors, Meeter Gap combines the proven flexibility and modularity of the Meeter family with a practical operational advantage. The result is a seating solution that not only supports layout adaptability and user comfort, but also improves day-to-day efficiency for operators and facility managers.

With its modular logic, Node allows designers to build straight, curved and expansive seating landscapes that adapt to the scale and rhythm of each project. Available in two heights and multiple straight and rounded modules, Node supports everything from open social interaction to more defined spatial zoning.

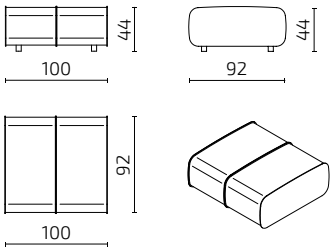

Its larger form makes it particularly well suited for foyers, waiting areas, hospitality spaces, educational hubs and public interiors where furniture must do more than provide seating — it defines the atmosphere and creates purposeful gathering points.

Leaning wall

Design: Karl Kukk

Sometimes, there's not enough space for a comfortable sofa, but you still want to make waiting comfortable. The day is saved by the soft leaning wall Hover, which you can lean on to pass the time alone or chatting with a companion.

Hover is brilliantly space-saving and fits perfectly in places where you might need to stand, such as at the airport, in a corridor, or behind a meeting room door. Placed in the office kitchen or in an in-between space, it provides a convenient spot for exchanging ideas with a colleague on the go. Hover is available as a module in four different sizes. By adding a coffee table and a power socket, you can even get work done while leaning. Quickly installable and featuring easily replaceable fabric, Hover also offers noise-dampening properties thanks to its foam and perforated inner panel. Hover is designed for disassembly fully embracing the principles of circular design.
